

Fall 2016 Responsible Conduct Of Research

Attention Graduate Students Register this Fall 2016 for UNIV 594

UNIV 594
**Responsible Conduct
of Research**

Wednesdays
Fall 2016
12:10-1:40 PM
BRC 280
Rice University

Responsible conduct of research is defined as the practice of scientific investigation with integrity. It involves the awareness and application of established professional norms and ethical principles in the performance of all activities related to scientific research.

To accommodate the recommendations established by federal agencies for training in the Responsible Conduct of Research, training in the responsible conduct of research at Rice University has been modified to include mentoring and contemporary ethical issues in science and to add significant discussion of individual case studies. Dr. Stacey Kalovidouris will be organizing this course with the outstanding support of senior faculty and staff guest lecturers from Rice University.
